

Myrtle Beach - Traffic Incident Management Team

Training provided through a partnership of the South Carolina Department of Transportation, South Carolina Department of Public Safety and Federal Highway Administration.

Core members of the Myrtle Beach Traffic Incident Management team are invited to a free training on November 6. Go to <http://tinyurl.com/myrtlebeachtim> to register.

This training is a demo intended for the core team prior to a larger deployment.

Free training – Quick clearance of traffic incidents, increased responder safety.

Date and Time	Thursday, November 6 9 am - 4 pm (lunch provided)
Location	M. L. Brown Public Safety Building 2560 North Main Street Conway, SC 29526
Contact	Mike Bowman, SCDOT 803.737.9942 bowmanmc@scdot.org www.scdot.org

Traffic incidents have an immediate impact on transportation operations, including a reduction in the reliability of services and an increase in risk for responders. As much as 25 percent of all roadway delays are the result of traffic incidents.

In addition to billions of dollars in wasted fuel and productivity, traffic incidents represent a significant danger to responders and motorists. The likelihood that a secondary and more severe crash will occur in backup increases every minute that travel lanes remain blocked.

Successful and safe quick clearance requires advanced training and coordination involving all responding disciplines. Quick clearance means lowered risks for personnel and reduced chances for additional wrecks.

Training attendees should include those working in the following areas:

- State and Local Law Enforcement
- Fire and Rescue
- Emergency Medical Services
- All Transportation Agencies
- Towing and Recovery Services
- Hazardous Materials Management Responders
- 911 / Emergency Notification and Dispatch
- Coroners and Medical Examiners
